

From Medical Monopoly to Market Competition: A Paradigm Shift in Healthcare

The healthcare industry has long been dominated by a handful of large, powerful organizations. These organizations have had the ability to set prices, control access to care, and stifle competition. As a result, healthcare costs have skyrocketed and quality of care has suffered.

But a new era is dawning in healthcare. The Affordable Care Act has created new opportunities for competition, and consumers are beginning to take control of their own healthcare decisions. As a result, the healthcare industry is being forced to change.

In his new book, *From Medical Monopoly to Market Competition*, Dr. Howard Milbank provides a comprehensive examination of this transformation. Milbank draws on his decades of experience in the

healthcare industry to explain how we got to where we are today, and what we need to do to create a more just and equitable healthcare system.

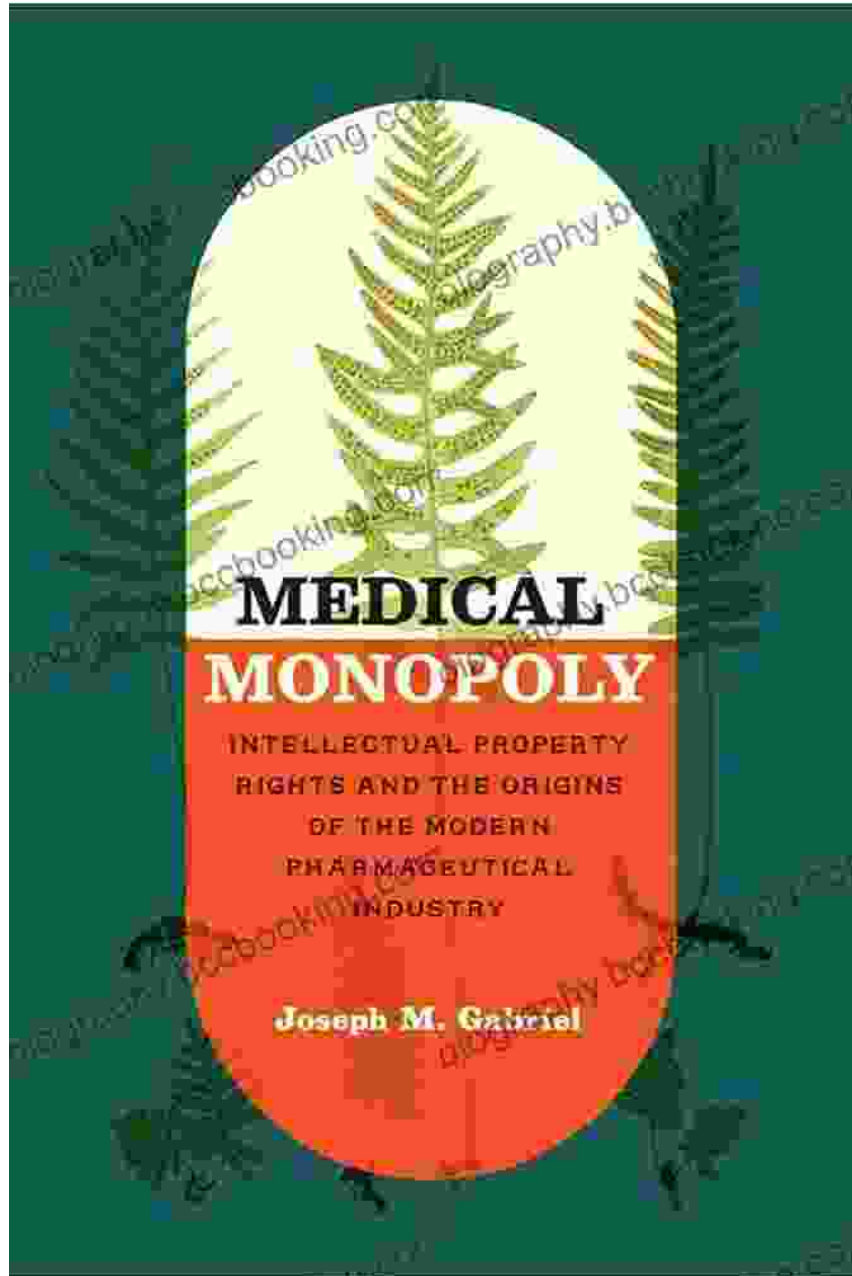

In *From Medical Monopoly to Market Competition*, Milbank argues that the healthcare industry is at a crossroads. We can either continue down the path of monopoly and cronyism, or we can embrace market competition and give consumers more control over their own healthcare decisions.

Milbank believes that market competition is the best way to improve the quality of healthcare and lower costs. When organizations are forced to compete for patients, they have to provide better care and lower prices. This is why we have seen such dramatic improvements in the quality of healthcare in recent years.

From Medical Monopoly to Market Competition is a must-read for anyone who wants to understand the future of healthcare. Milbank provides a clear and concise analysis of the challenges facing the healthcare industry, and he offers a roadmap for creating a more just and equitable system.
