

Guide to Scientific Writing for the Global Market: A Comprehensive Guide for Researchers

Scientific writing is a specialized form of writing that communicates the results of scientific research. It is a vital skill for scientists and researchers, as it allows them to share their findings with the broader scientific community and the general public. However, scientific writing can be challenging, as it requires a clear understanding of the scientific method, as well as strong writing skills. For researchers who are not native English speakers, the challenge of scientific writing can be even greater.

Real Science in Clear English: A Guide to Scientific Writing for the Global Market (SpringerBriefs in Education) by Brian Smith
